## Full Stack Engineer

A Full Stack Engineer with 6 years of professional experience, specializing in web development, project management, Agile methodology, and quality assurance testing .

Adept at coordinating effectively with development teams, clients, and non-technical stakeholders to execute complex web development projects.

## Work Experience

3/2018 - 3/2019

Niteco I Hong Kong

### Front End Engineer

- Spearheaded the frontend development of the Bemz e-commerce platform (<https://bemz.com/>), a prominent Swedish firm specializing in bespoke IKEA furniture covers. Implemented a responsive, user-friendly interface using Next.js, enhancing user experience and ensuring optimal SEO performance.
- Worked collaboratively in a dedicated team of three developers, managing diverse facets of the project - from order processing and product display to integrations and performance enhancements.
- Played a pivotal role in integrating and finalizing the payment feature, leveraging the PayPal API. This ensured secure and seamless transactions for Bemz customers, elevating the overall shopping experience and trust in the platform.

2/2017 - 11/2017

NTQ SOLUTION I Hong Kong

### Web Development Intern

- Worked on improving the website's responsiveness using CSS Flexbox and Grid, ensuring a seamless user experience across various devices.
- Applied theoretical knowledge from web development coursework to practical challenges, enhancing the company's website's responsiveness and reducing page load times by 20%.
- Collaborated with a team of developers to design and implement a feature-rich, user-friendly interface for the company's new product portal, resulting in increased user engagement.

## Education

### B.S. in Computer Science

Singapore University of Technology and Design (SUTD)

5/2013 - 11/2016

Researched the project focused on "Deep learning algorithms for image recognition" using Deep Learning.

This research has resulted in the creation of a system that can actually be used for building entry/exit control.

This system succeeded in both streamlining daily work flows and strengthening security, demonstrating the effectiveness of deep learning in actual business situations.
